

Release Notes – SmartDocs 2018.1.23125

SmartDocs 2018.1.23125 is a minor release for SmartDocs that contains improvements for signing in to Microsoft 365 using modern authentication, including new functionality that allows you to sign in to Microsoft 365 using the Microsoft Edge web browser.

How do I download and install this release?

You can download SmartDocs 2018.1.23125 from the SmartDocs download page:

<https://www.36software.com/smartdocs/download>

After downloading the SmartDocs 2018.1.23125 installer, close all instances of Microsoft Word and execute the installer. After installation has completed, the installer will launch Microsoft Word and you can begin using SmartDocs.

If you have a previous version of SmartDocs installed, the installer will attempt to automatically uninstall the previous version before installing SmartDocs 2018.1.23125. If the installer is unable to uninstall the previous version, then you can use Programs and Features in your Windows Control Panel to remove the previous version.

If you have previously activated SmartDocs on your computer, then no activation is required for SmartDocs 2018.1.23125. If you have not yet activated SmartDocs on your computer, then activation will be required before you can begin using SmartDocs 2018.1.23125. SmartDocs can be activated from the SmartDocs ribbon in Microsoft Word (SmartDocs ribbon > Activate License).

What are the end user requirements for this release?

SmartDocs 2018.1.23125 supports the client versions of Microsoft Office 2013/2016/2021 (including the client versions of Microsoft 365) running on Windows 10 or Windows 11.

Before installing SmartDocs, the Microsoft .NET Framework (version 4.8 or greater) must be installed on your computer. Most computers already have the .NET Framework 4.8 installed; if it is not installed, you can download and install it from Microsoft's website.

What are the SharePoint requirements for this release?

SmartDocs 2018.1.23125 supports all editions of SharePoint 2013/2016/2019, including cloud-based SharePoint hosted in Microsoft 365 (also known as SharePoint Online).

Need some help?
